

IRON 2.0

FRONT ACCESS - INDOOR FIXED APPLICATION

OVERVIEW

With a size of 500 x 500 x 63 mm and a weight of 6.9 kg per cabinet, the IRON 2.0 (front maintenance) is the most reliable product for indoor installations. It's thinner and lighter than its predecessor. Because of its front maintenance, it suits perfectly installations against a wall where you usually don't have access to the back of the cabinet. Built to be quickly and easily installed, the IRON 2.0 is a reliable product with a long life expectancy. Furthermore, it's a cost-effective LED display whilst allowing a thin pixel pitch led display starting at P1.95.

FEATURES

FRONT MAINTENANCE

The IRON 2.0 is the ideal LED cabinet for a display against a wall, which generally doesn't allow a back access to your LED screen. Thanks to a magnetic tool, the different modules can be removed from

the front to replace them or to access the reception card or the power block. The maintenance can easily be handled by one technician.

SLIM AND EFFICIENT DESIGN

Even though the IRON 2.0 was conceived for indoor installations, it is a robust product made out of die-cast aluminum. It was designed to be both slim, light, and user-friendly. The cable management system was integrated into the LED cabinet in order for your led display to remain discreet in an indoor environment.

INDOOR PIXEL PITCH & COST-EFFECTIVE CABINET

The IRON 2.0 is available from P1.9 to P3.9 for your indoor installations. It gives you access to a fine pixel pitch

whilst keeping a low budget for a high quality product.
