

LED COUNTER

TRANSPARENT LED COUNTER

OVERVIEW

Our LED COUNTER is one of our best LED solutions for indoor applications, fitting both decorative and purposeful installations. Its transparency allows you to display visual content without blocking the visibility in the room. This product is available in different sizes and supports many integration methods as well as different shapes. These customizations are made possible by the use of photoelectric glass, a patented technology that conducts electric current between the LEDs while retaining the transparency of traditional glass.

APPLICATION
Indoor

BRIGHTNESS
≤ 4000 NITS@ 5volts

INGRESS PROTECTION
IP42

WEIGHT
32kg/m²

PIXEL PITCH
P10.4

MATERIAL
**Photoelectric glass
+ aluminum**

DISPLAY AREA (ø)
**700 x 400 mm
1000 x 500 mm**

MAINTENANCE
Front & back maintenance

FEATURES

PHOTOELECTRIC GLASS

The use of photoelectric glass as the base material of this LED solution offers an extremely wide range of customizations for your LED COUNTER. Upon

request, we can provide many different shapes and dimensions to fit your project.

BRIGHTNESS

The LED COUNTER allows up to 75% transparency thanks to its asymmetric pixel pitch and the use of photoelectric glass. With a brightness going up to 4000 NITS and IP42 ingress protection, a semi-outdoor application can be managed. This product can fit a large range of aesthetic applications, as well as more practical ones.

TRANSPARENCY

The glass used for the LED COUNTER is a specially designed current-conducting glass that connects the LEDs. Therefore, the absence of cables or PCB allows for incredible visibility through the LED COUNTER, while the glass' waterproof properties protect the LEDs.
